- Graduate-level degrees
- Educated on common EA practices and frameworks
- Certifications in TOGAF as well as popular products and technologies
- Past employment with Fortune 100 companies

Experience in developing IT Capability Roadmaps aligned to Strategic Business Initiatives

Experience with defining core architectures aligned with the Business Operating Model

SIBRIDGE has partnered and delivered Enterprise Architecture services for many of our clients including Sprint Corporation, Cisco, Yellow Roadway Corporation, Hertz, HealthMarkets and GameStop.

**Enterprise Architecture Advisory Board Service**

The use of independent directors on boards of private and public companies has long been considered a “best practice.” Independent members possess greater objectivity and less conflict of interest when contributing to the purpose of the board. IT organizations have also realized the benefits of seating external, independent members on their EA governance bodies.

**Description**

SIBRIDGE will provide an independent advisory member for your Enterprise Architecture Review Board or similar EA governing body. Drawing from our practiced Principals and Sr. Consultants, we can provide the oversight you seek with respect to architecture experience and industry familiarity.

**Approach**

SIBRIDGE advisory members will participate in regularly scheduled meetings of your EA governance team. Offline research and review of your architecture topics and materials ensure the advisory member contributes effectively when onsite. Advisory members are available via electronic communication between scheduled meetings for answering questions and seeking guidance as required. Flexible engagement models allow you to appropriately manage the cost-benefit of this service.

**Benefits**

- Guaranteed IT Conscience
- Hold IT to principles & roadmaps previously established
- Voice unpopular truths and analysis
- Provide IT executives with insight into EA effectiveness
- Exposure to proven approaches and techniques leveraged by other SIBRIDGE clients-inside and outside of your industry
- Guidance in maturing EA practices and processes
- Assistance in developing strategies, architectures, and business cases
- Periodic briefings on emerging concepts & technology trends
- Access to other SIBRIDGE Principals and Sr. Consultants for guidance on specific topics
- Ongoing technology perspectives and opinions via SIBRIDGE social content feeds
